**PEABODY ACADEMY OF SCIENCE.**

East India Marine Hall, 161 Essex street. Founded in 1867, with funds given by George Peabody of London. *President*, William C. Endicott. *Vice-President*, Henry Wheatland. *Secretary*, Abner C. Goodell. *Treasurer*, John Robinson. *Trustees*, William C. Endicott, Henry Wheatland, Abner C. Goodell, John Robinson, S. Endicott Peabody, James R. Nichols, George Cogswell, Geo. Peabody Russell, Othniel C. Marsh. *Director of Museum*, Edward S. Morse. *Assistant*, John H. Sears.

In 1867, East India Marine Hall, erected in 1824, was purchased and refitted for collections. It now contains the Museum of the East India Marine Society, commenced 1799, and the Natural History Collection of the Essex Institute, commenced 1834, received as permanent deposits, besides accessions since made by the above-named Societies and the Trustees of the Academy. The Museum is especially rich in the Ethnology of the South-Sea Islands, China, Japan, Africa, India, etc., and contains an almost complete collection illustrating the Natural History and Archaeology of Essex County. It is open, free to the public, every week-day, from 9 to 12 and from 1 to 5 o'clock. The average number of visitors for fifteen years is upwards of 35,000 annually.

The Academy has published six scientific memoirs, besides annual reports, and classes and lectures in Botany and Zoölogy have been regularly conducted.

**PLUMMER FARM SCHOOL OF REFORM FOR BOYS.**

This school was founded by the munificent bequest of Miss Caroline Plummer. It is a school for juvenile offenders in the city of Salem. The amount of the bequest was \$25,000; present fund, \$50,000. Incorporated May 21, 1855. The school went into operation Sept. 23, 1870. *President*, William I. Bowditch. *Treasurer and Secretary*, Gilbert L. Streeter. *Supt.*, C. A. Johnson. *Matron*, Mrs. C. A. Johnson. *Trustees*, Wm. I. Bowditch, Gilbert L. Streeter, William Chase, S. P. Andrews, William G. Webb, James Dugan, Thomas Nichols, jr., James B. Curwen, George B. Loring, Edmund B. Willson.

**PLUMMER HALL.**

This building is located at 134 Essex street. It was erected in 1856, from funds left by the late Miss Caroline Plummer. The first story contains a portion of the library and the historical collections of the Essex Institute, also periodicals and publications of societies received in exchange. The second story contains in the western ante-room some of the principal works of reference, and the new books belonging to the Salem Athenæum; in the eastern ante-room the libraries of the Essex South District Medical Society and the Essex Agricultural Society; in the large hall the principal portions of the libraries of the Salem Athenæum and the Essex Institute. The libraries of the several societies in the building contain about 60,000 bound volumes, besides a large collection of pamphlets.

**SALEM ATHENÆUM.**

THE  
Salem Register

— AND IS PUBLISHED ON —  
WAS ESTABLISHED IN THE YEAR 1800,

— AT —  
MONDAYS AND THURSDAYS,

— BY —  
195 Essex; cor. of Central Street,

CHAS. W. PALFRAY AND EBEN N. WALTON.

Terms of Subscription, \$3.50 a year in advance, otherwise, \$4.

**REGISTER MOTTO, FURNISHED BY JUDGE JOSEPH STORY, in 1802.**

Here shall the PRESS the PEOPLE'S RIGHTS maintain,  
Unawed by INFLUENCE, and unbribed by GAIN;  
Here PATRIOT TRUTH its glorious precepts draw,  
Pledged to RELIGION, LIBERTY, and LAW.

For more than *eighty years* the REGISTER has been a reputable Family Paper in Essex County, and its large circulation in Salem and the neighboring towns, makes it a desirable medium for local advertisements and for parties desirous of securing customers in this vicinity.

**TERMS OF ADVERTISING:**

Advertisements of more than half a square, and not exceeding a square, \$1.50 for three insertions, once a week, or in three papers in succession, at the option of the advertiser; 16½ cents for every additional insertion.

Advertisements not exceeding half a square, \$1.00 for three insertions as above; 12½ cents for every additional insertion.

Probate Notices of every kind, not exceeding a square, \$1.50 for three insertions; exceeding a square, at ruling rates.

*Sixteen lines of Nonpareil type* are equal to a square.

When advertisements are ordered to be continued on the **INSIDE**, fifteen per cent. extra must be paid for each insertion.

Ten cents a line must be paid for notices of meetings for political, civic, and religious purposes, notices of societies, cards of acknowledgment from individuals, companies, etc., for one insertion, and 6¼ cents for each subsequent. Business notes, 15 cents per line for first insertion; ten cents a line for the second, and six and a quarter cents a line for each subsequent insertion. Funeral notices twenty-five cents. Obituary notices or poetry, ten cents per line.

The privilege of Annual Advertisers is limited to their own immediate business; and all advertisements for the benefit of other persons, as well as all legal advertisements, and advertisements of real estate, or auction sales, sent in by them, must be paid for at the usual rates.

☞ All advertisements intended for this paper must be marked on the margin of the copy the number of insertions desired; otherwise they will be published till ordered out, and charged accordingly.

\*.\*No paper will be discontinued till all arrearages are paid, except at the option of the publishers; and any person wishing his paper discontinued must give notice thereof *at the expiration of the term, at the office, whether previous notice has been given or not.*

# THE EVENING POST

— IS A —

RESPECTABLE FAMILY DAILY PAPER,

FREE FROM OBJECTIONABLE FEATURES, AND GIVING

THE LATEST RELIABLE NEWS.

IT HAS A LARGE AND CONSTANTLY INCREASING LIST OF

Advertising Inserted at Reasonable Rates.

*For the Six Months ending June 31, 1883, the average circulation of the NEWS was*

**OVER 32,000 COPIES WEEKLY**

ROBIN DAMON, PUBLISHER.

# THE SALEM GAZETTE

— AND —

## Essex County Mercury.

THE SALEM GAZETTE,

[ESTABLISHED 1768],

IS PUBLISHED ON TUESDAY AND FRIDAY MORNINGS,

FOR \$3.50 PER ANNUM, PAID IN ADVANCE,

Or \$4.00 if paid Semi-Annually NOT in Advance.

It will be found to present a faithful transcript of the Local and County news, good general reading for the entertainment of the family, original correspondence from distant points, editorials upon passing topics, and a good statement of the current news of the day, domestic and foreign.

### THE ESSEX COUNTY MERCURY

Is made up from the reading matter of the Salem Gazette, and published as a weekly edition of the Gazette, for \$2.00 per annum in advance, or \$2.50 otherwise. It circulates both in Salem and in the country towns of Essex County (for the most part in the country), and is regularly and extensively read and known throughout the county. Being made up from the same reading matter, the Mercury partakes of the same general characteristics of the Salem Gazette.

#### TO ADVERTISERS:

The SALEM GAZETTE is circulated mainly in Salem; the ESSEX COUNTY MERCURY principally out of Salem, in the County of Essex. Every new advertisement in the Gazette has an insertion also in the Mercury, without additional charge. There is not a city or town in Essex County, where the Gazette or Mercury is not taken. In Beverly, Marblehead, Peabody, Danvers, Middleton, Lynnfield, Wenham, Hamilton, Ipswich, Rowley, Topsfield, Georgetown, Boxford, Essex, Manchester, and even in several of the towns more remote from Salem, the circulation is large. Every new advertisement is placed before about 3,500 subscribers. There is scarcely a month through the year when the circulation is not at times in excess of this. As both the Gazette and Mercury are largely sent into distinct families, and are largely exchanged with other families in country neighborhoods, we presume it is a fair estimate to say that these papers have full twenty thousand distinct readers every week.

### BOOK, JOB AND FANCY PRINTING,

EXECUTED AT THE OFFICE OF THE

SALEM GAZETTE & ESSEX COUNTY MERCURY.

No Two Persons  
SHOULD USE  
THE SAME BRUSH.

No. 8 Beacon Street, . . . . . Boston.

G. F. WATERS,

This Brush is carefully made by hand and will last a life-time. It is made of vegetable fibre, with a due amount of animal fibre upon one side, making a positive and negative electrical surface, practically, a double instrument. The material is so disposed that, when in use, a firm looped fibre is brought in contact with the surface to be acted upon instead of the ends of bristles as in the old brush, giving it great detergent power. It assists in restoring to and preventing the return of the normal functional activity of the skin, and in promoting the normal functional activity of the lungs and kidneys in passing from the blood of much clogging, sticky matter, that would otherwise oppress the circulation and might injure the lungs and kidneys in passing most of the benefits of that luxury, and by it a better Massage Treatment is had in five minutes than by the hand in an hour. A proper daily use of this Brush helps all the organs of the body towards a healthy activity. It will be sent free of expense with full directions for use worth more to any one than the price of the brush, on receipt of \$6.

## TO DOCTORS AND THE PUBLIC.

Years of experience in the regular practice of medicine has convinced me of the necessity of a well-conducted Lying-in Home, for the protection of unfortunate females during Pregnancy and Confinement.

I have superior accommodations, everything first-class, cosy, and home-like, beautiful, healthful retreat, in the environs of the city of Fort Wayne, Ind. All wishing to avail themselves of such an institution will not be disappointed in patronizing me.

Board, from \$8 to \$25 per week, according to time they stay and rooms occupied. If you are in trouble, write, or call on me, enclosing stamp.

Any one wishing to adopt a baby, correspond with me.

P. S.—When desired, references will be given to physicians who have sent patients to my care. Address

**FREDERICK THAYER, M. D.,**

—Page 2.—

—THE J. C. HOADLEY—

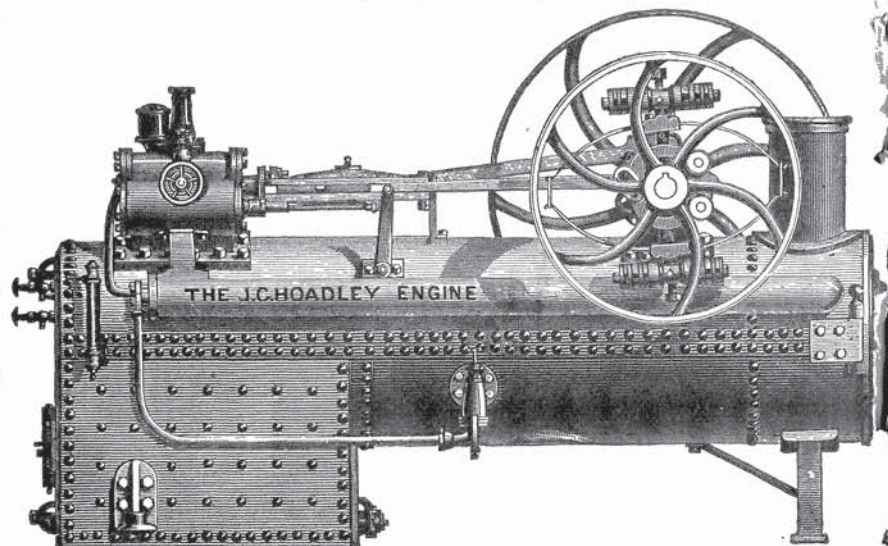

—IMPROVED—

# PORTABLE ENGINES.

—All Sizes from 9 to 100 Horse Power.—

(COVERED BY FIVE PATENTS.)

Made only by **GEO. T. McLAUTHLIN & CO.**

This cut shows the unmounted Engine complete, except the Smoke Pipe, with Pump and Regulator ready for use.

These wonderfully efficient and economical variable Cut-off Portable Engines have no competitors in ECONOMY OF FUEL AND WATER, and in regulation of speed.

They are widely known and have attracted the favorable attention of many expert Steam Engineers, both at home and abroad.

At the Centennial, after most thorough and exhaustive tests, the **HOADLEY PORTABLE ENGINE** received the **HIGHEST AWARD**, and the highest possible approbation of the Judges. See their official report, Group No. 20.

—These Improved Hoadley Portable Engines—

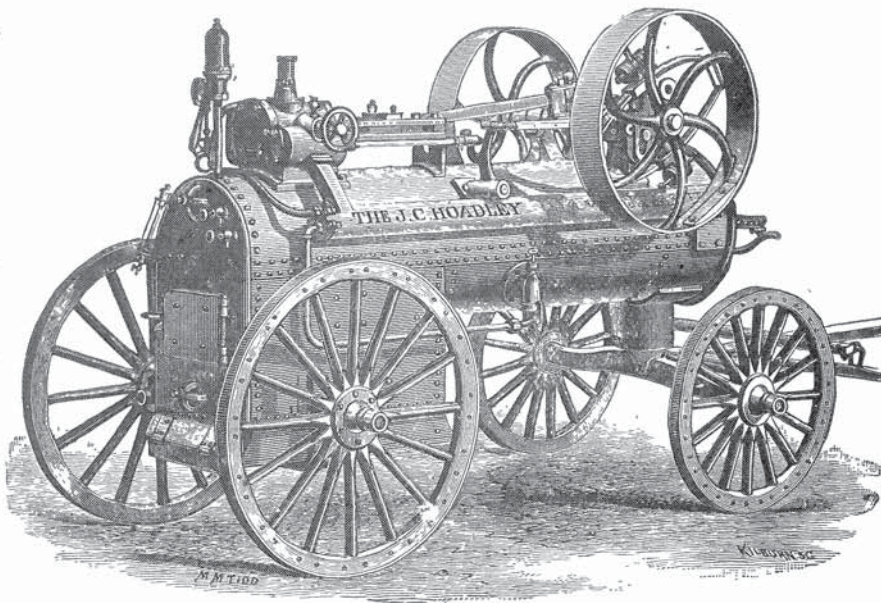

Are made with Automatic Cut-off Regulator, Balanced Valve, Steam Jacketed Cylinder and Valve Chamber, Direct Regulator Connection, &c., and require *only about one-half the boiler, fuel, steam and water* of Mr. Hoadley's former noted Standard Portable Engines. They equal in average economy the best Stationary Engines and Boilers in general use.

We apply these improvements to the Old Style Hoadley, or to any first-class, strongly made Portable Engines, and guarantee *one-third gain in power from the same boiler and fuel.*

—BELOW IS A CUT SHOWING THE—

—MOUNTED ENGINE COMPLETE,—

—EXCEPT THE SMOKE PIPE.—

—WE ALSO MAKE—

STATIONARY HOADLEY ENGINES

—UNDER THE SAME PATENTS.—

They are not excelled in economy, are exceedingly simple, and of moderate cost. Their perfection of speed renders them valuable for

—ELECTRIC LIGHTS.—

# McLAUTHLIN'S

PATENT

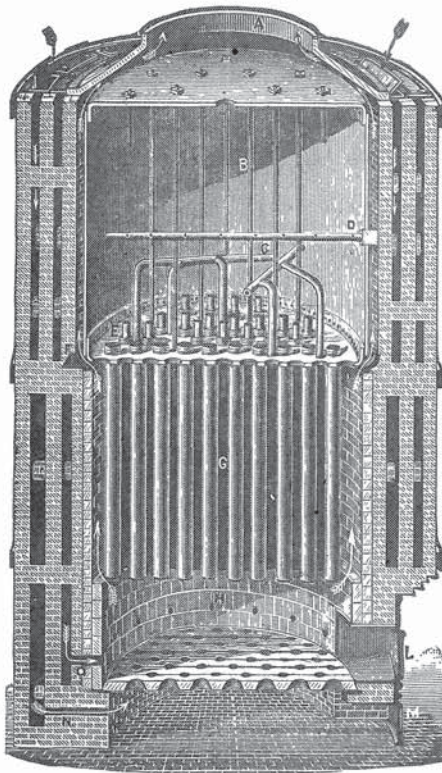

## DROP-TUBE SAFETY STEAM BOILERS,

COMBINING

Large steam and water space; perfect circulation; entire freedom from unequal expansion; ample heating surfaces; superior draft; suspension entirely within the fire chamber; protected brick work,—the supply of air passing down its air spaces, which also prevents waste of heat through it;—manifold safety blow-off,—which, combined with the enforced circulation, admits of using water that would prove dangerous in ordinary boilers;—distributive safety feed, etc., etc.

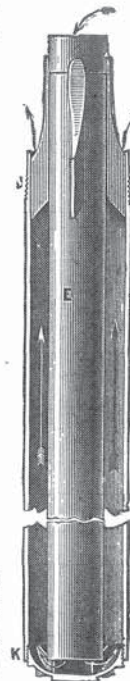

### THE LARGE CUT IS A VERTICAL SECTIONAL VIEW.

A, central smoke flue; B, steam and water cylinder; C, water tubes projecting through tube sheet; D, manifold blow-off, drawing from surface of crown sheet; E, distributive safety feed-pipe; F, supporting rings, having lugs on which boiler rests. Ascending arrows show boiler entirely enveloped in the fire and gases. Descending arrows show supply of air through the brick work.

### THE SMALL CUT.

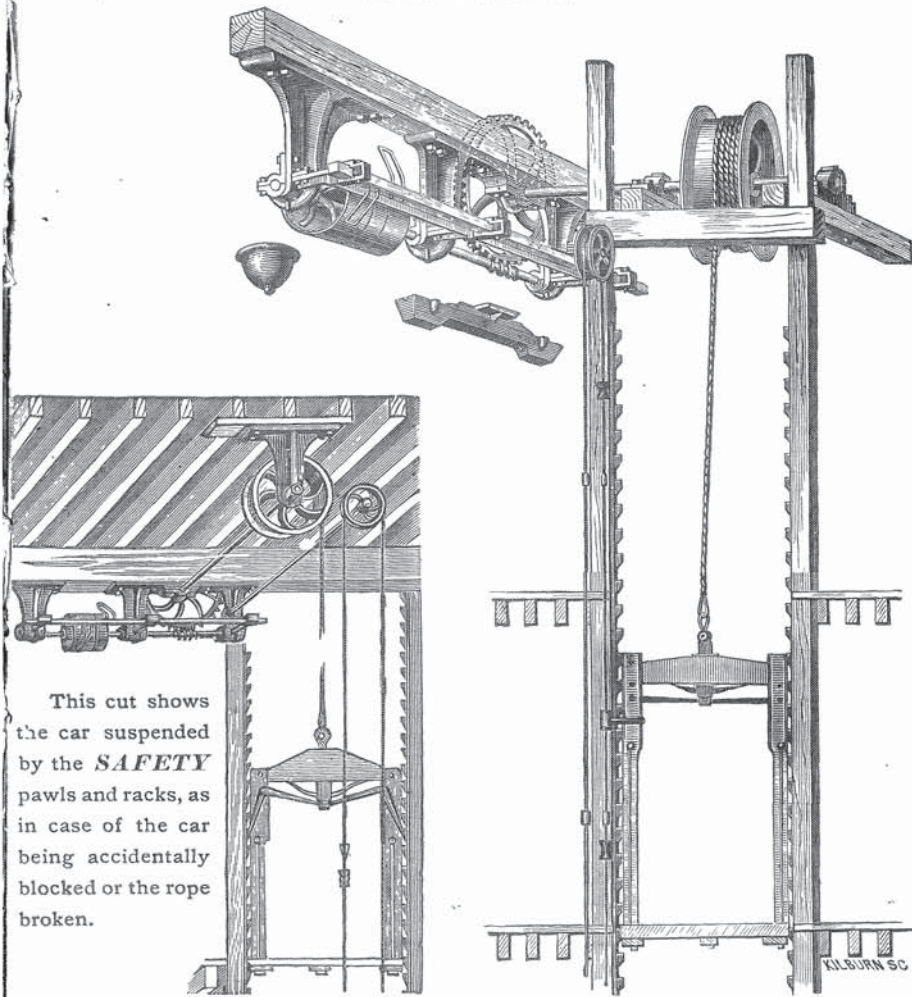

shows one of the tubes enlarged, the fire-tube J K in section. Circulating tube E rests on centering lugs on plug K. The tube guide at the top sustains itself by spring pressure, and receives tube E loosely within it.

These Boilers have proved, by fourteen years use, remarkably economical and free from repairs or accident. They are made only of superior strength, materials, and workmanship, and are sold at the price of ordinary horizontal tubular boilers.

# PASSENGER, FREIGHT, CARRIAGE HAND ELEVATORS,

HOISTING WHEELS, HATCH COVERS, &c., &c.

This cut shows the car suspended by the *SAFETY* pawls and racks, as in case of the car being accidentally blocked or the rope broken.

Our Freight Elevators are without a competitor in price for an Elevator of their class. They are very extensively adopted, and *none* are operated with better satisfaction.

The cuts are imperfect, but give a general idea as put up on the simplest and most durable plan.

We get them up in styles to meet all locations and uses.

# TEST TURBINE WATER-WHEELS.

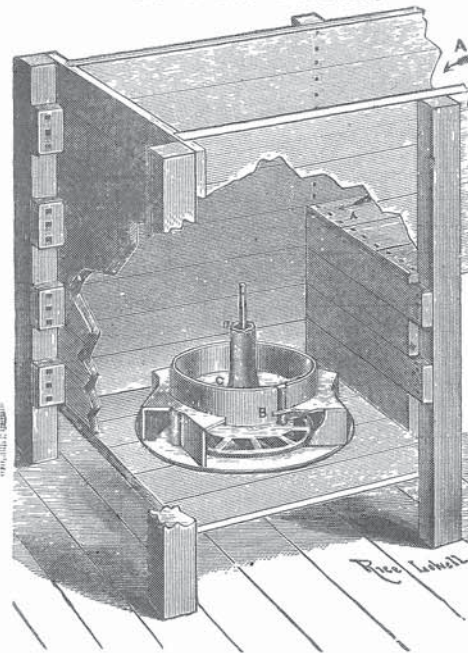

PRICES LARGELY REDUCED.

Over thirty years' experience in the Water-Wheel business, and a series of 5300 of the most accurate comparative test experiments on record, have led to the production of our

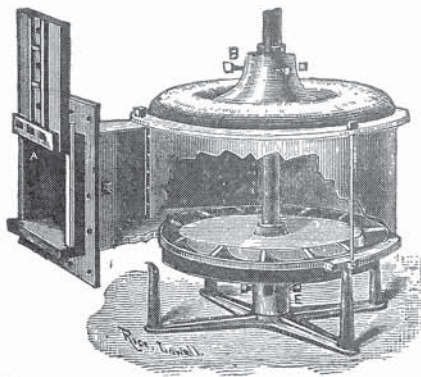

## No. 1 and No. 2 TEST TURBINES.

*We claim that for a term of years, working under the conditions that mills are generally subject to, the No. 1 has not its equal in average economy of water, and freedom from care, interruptions and delays; and that the No. 2 is not excelled by any Wheels that can be furnished and put in at so little cost.*

No. 1 Test Turbine.

No. 2 Test Turbine.

In the No. 1, the water discharges under the flume bottom, on which the Wheel is set.

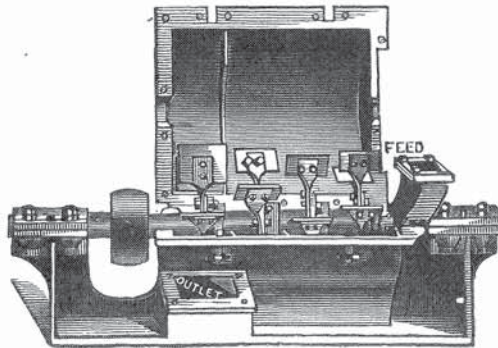

The gate B C is open. It slides within the spout case, closing upon a seat at its rim, near the level of the Wheel. It is proof against leakage and wear.

The No. 2 is in iron casing. It is set outside of the flume. We also fit these with wood casing.

The upper parts of the shafts are not shown.

THE PATENT

MAGIC PULVERIZER

Has proved by years of *PRACTICAL WORK* its superiority for pulverizing **FRIABLE AND SEMI-FRIABLE MATERIALS**. No dressing or sharpening is required, and the wearing parts are easily replaced.

It consists of a Horizontal Cylindrical Case, with a rapidly revolving shaft carrying **STEEL PADDLES** in the first part, and **EXHAUST FANS** in the second, the combined operation of which creates concussive action of the grains upon each other in millions and in numberless repetitions, the material only escaping the combating vortices by the exhaust current, which is regulated for the fineness required.

It has been successfully used on a wonderful variety of materials, including **Ores, Minerals, Mica, Glue, Bones, Asbestos, Sugar, Grains, Dried Roots, Paints, Chemicals, Fertilizers, etc.**, and for **GRANULATING** corn, meal, glue, etc. It has also proved valuable for **TRITURATING LIQUIDS**.

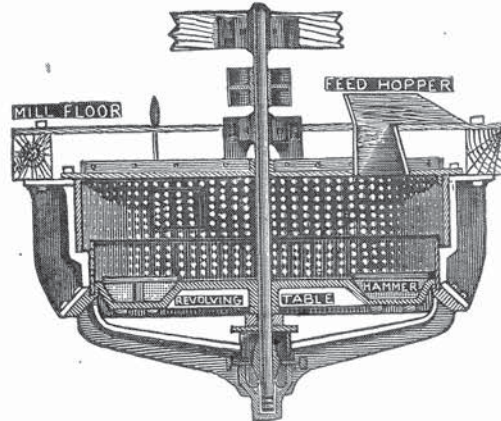

The engraving shows a small machine thrown open to show the internal parts.

A hopper to be placed at the "FEED" aperture conducts the material into the machine. The "OUTLET" is to be connected by a pipe to a large settling chamber, into which the pulverized material is discharged. The diaphragm seen within the casing is proportioned for **medium work**; for coarse it is made narrower, and for fine, wider.

Page 8.

THE PATENT

# MAGIC CRUSHER

Is adapted to all FRIABLE and most SEMI-FRIABLE substances, as proved by years of practical use. It consists of a Revolving Table, with Steel Hammers attached, placed upon a vertical shaft, and surrounded by a perforated casing, within which it revolves and through which the crushed material is discharged. The grade is controlled by the size of the perforations in the casing.

—The Material thrown in receives at the rate of 5000—  
—Shattering or Rending Blows per Minute, of a—  
—force due to a velocity of two to three—  
—miles per minute.—

No Crusher known works with less power or less wear and repairs. It crushes easily FIVE TONS AN HOUR, and COSTS LESS than any other of similar capacity.

The Cut is a vertical sectional view.
