## Street and Householders' Directory.

The street directory gives the location of each street, and shows what other streets or places run from or across it. The house numbers are given in left and right hand columns, with the names of heads of families and persons in business, in the order of location.

Houses without numbers are indicated by a —, and the dash is also used opposite connecting streets to indicate whether such streets begin or end on the left or right side.

The star (\*) indicates streets that have been accepted by the city; and two (\*\*) indicate streets a part of which has been accepted. Many streets not so designated are considered public streets by reason of long continued usage.
