

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

PREFACE.

THE following Register is designed as an introduction to a biographical and genealogical dictionary, which shall comprehend concise sketches of those individuals who have been known and distinguished in the annals of New-England. If the health of the compiler should admit of the completion of such a work in the manner contemplated, it will contain biographical accounts of many persons here but slightly noticed, and a continuation of eminent persons from the close of the seventeenth century to the present time.

An arrangement of names like the following, in this age of antiquarian research and inquiry, seemed to be wanted. We are all curious to know something respecting those who have preceded us in the stage of action; and there has begun a curiosity among many of the present generation to trace back their progenitors, in an uninterrupted series, to those who first landed on the bleak and inhospitable shores of New-England. And it is not improbable that the arrival of the puritan fathers of New-England will form a more memorable epoch in history than the Conquest of England does in that country, and that posterity, a few centuries hence, will experience as much pleasure in tracing back their ancestry to the New-England colonists, as some of the English feel in being able to deduce their descent from the Normans.

There is a satisfaction in recognizing our first ancestor from the European continent; in knowing from what part of Great-Britain he came; where he settled, and the circumstances and condition of his family. Owing to the trials and hardships endured by the first settlers of New-England, the uncertainty of their remaining in the country, and the little time afforded them for recording family data and genealogical facts, there are but few families, who have full and complete satisfaction in each of these particulars. But some facts, even at this late period, might be known of almost every individual who settled in any of the colonies, if suitable patience, research, and industry were employed in collecting them. Our earliest records and memorials are full of information, and in regard to minuteness and accuracy will bear a comparison with those of modern date; and it is somewhat remarkable that so large a portion of them have escaped the many perils to which fire and the aboriginal wars exposed them. But many town records are in a decaying state, and those in whose hands they are deposited are highly culpable that they do not use their efforts to have them fairly and correctly transcribed.

The following work is intended to contain the names of a large portion of the First Settlers, of the most prominent, as well as the more humble; of those who had "to level forests, where savage beasts and savage men had roamed for ages, and to make comfortable dwelling places amidst a wide and gloomy wilderness." But no one can reasonably expect it to contain the names of *all* who early came to New-England. To bring the names of *all* from their musty and moth-eaten concealment would be a labour beyond the power of a single individual. The object in the progress of the undertaking has been to give,

I. The names of the Magistrates, and Ministers of the Gospel, in all the New-England colonies from 1620 to 1692.

II. The Deputies or Representatives of the General Court, of the colony of Massachusetts, from 1634 to the commencement of government under the new charter of 1692.

III. The Graduates of Harvard College, and the Members of the Ancient and Honourable Artillery Company, from the date of those institutions until 1662.

IV. The Freeman admitted to the Massachusetts colony, in the colony records, from 1630 to 1662.

V. The names of all such Emigrants, both freemen and non-freemen, as could be collected, who had come over to the several colonies before 1643.

Besides those coming under these several heads, there have been given the names of many others, especially those who were the first of the name and family in the country, down to Philip's war in 1675. The four first objects (excepting a complete list of the counsellors of Rhode-Island) have been principally attained, and some idea of the deficiencies of the last may be had from a consideration of the number of persons, who had come to New-England from the first arrival at Plymouth to the year 1643, to which period it was originally the aim of the compiler to limit his inquiries.

Former writers have differed in their statements of the number who had come to this section of the country before 1640, when, according to Johnson, emigration "only for enjoyment of exercising the ordinances of Christ, and enlargement of his kingdom," ceased. But other causes operated to draw people from England, and it is not unlikely that there continued to be accessions of new settlers for, at least, the first half century from the beginning. Governour Hutchinson, in the preface to the first volume of his history of Massachusetts, says, "In the first ten years, about twenty thousand souls had arrived in Massachusetts." "Since then," he observes, "it is supposed more have gone from hence to England than have come from thence hither." Dr. Cotton Mather, who wrote in 1697, says, "the number who did actually arrive at New-England before the year 1640, have been computed about four thousand," which we must charitably suppose to mean *families*, for before that period three fourths of that number of *individuals* had come over in a single year. He also says, that after 1640 far more went out of the country than came into it. But Johnson, who wrote in 1651, within eight years of the time to which he makes his computation, and who had better means of knowing the truth than either Mather or Hutchinson, says, the number "for fifteen years space, to the year 1643, of men, women, and children, passing over this wide ocean, as near as at present can be gathered, is supposed to be 21,200, or thereabouts." This calculation of Johnson seems to embrace the whole of New-England, from the time of Endecott's arrival at Salem, in 1628, to 1643, while Hutchinson gives nearly the same number of emigrants to Massachusetts alone, within two thirds of the period mentioned by Johnson. Allowing five persons to have constituted a family, the number of male heads of families, if we regard Johnson's computation as correct, would exceed 4000, whose names should find a place in a perfect register of the emigrants to New-England during the first twenty-three years from the settlement at Plymouth. But, as many of the earliest settlers returned to England, or removed to other places, their proportion to those who remained can never be ascertained, and some deduction should therefore be made. Of the most of those who left, nothing very satisfactory can be obtained; and as they quitted the country at a time when their aid and services were most needed, we feel less solicitous to know their history, than of those who endured the heat and burden of the day.

The assertion so often made, that more persons have gone from New-England to England since 1640, than have come from thence hither, probably originated with Mather, who misunderstood the language of Johnson, and was perpetuated by Hutchinson, and has been adopted by succeeding writers of reputation. A little reflection may satisfy almost any one that if the remark was true in 1651, only eight years after the check given to emigration by the more favourable condition of the puritans in England, a lapse of forty-six years would be likely to affect the truth of it in 1697,

and it would appear still further from the truth in 1760, when Governour Hutchinson wrote his history.

The first settlers of Plymouth colony were separatists from the Church of England. Some of them had early embraced the sentiments of Robert Brown, but were reduced to milder principles under the tolerant and catholic Robinson. Those who settled the colony of Massachusetts were Puritans, *who had not seceded from the established church*. They were of that class of Episcopalians who had long laboured for reform in the rites and ceremonies of the church, and had contended that these should be regulated "by the rules of Scripture, and that nothing should be maintained which did not rest on that authority." "They had been chiefly born and brought up in the National Church, and had, until their emigration, lived in communion with her. Their ministers had been ordained by her bishops, and had officiated in her parochial churches, and had made no secession from her until they left their native land." They had long desired to establish churches in their worship, form, matter, and discipline, after what they conceived to be the model of the New Testament. They had long been persecuted by grievous impositions, by fines and imprisonments. But it seems that they did not relinquish the principles of a National Church, and of the power of the civil magistrate in matters of faith and worship. We know that in exercising this power our fathers greatly erred, but they erred in common with others of that age. The mild and forbearing principles of toleration were then hardly known, and had seldom been practised.

On the character of the great body of the following list, the compiler has not time nor ability to dwell. With a late writer, he believes that "the early colonists of New-England were on the whole a highly respectable community. Many of them were among the best specimens of what was then, and is now, the better class of society in England—its well educated commoners—men superiour, perhaps, to any of their successors in deep and extensive learning, and second to none for fervent piety, for their integrity and disinterested patriotism. But that all the early settlers of New-England were of this description is a supposition which, though it sometimes seems to have been taken for granted, is manifestly absurd. There were some in humble circumstances; poor, but respectable; and there were others needy adventurers, who depended on finding in a remote settlement the subsistence which they were unwilling to procure by honest exertion in their native land."

It is needless to observe to those acquainted with such labour, that much time has been bestowed on the compilation. The colony records of Massachusetts and Plymouth, the county records of Suffolk, Essex, Middlesex, and the ancient county of Norfolk, (now extinct) the ancient records of New-Hampshire, and those of many of the most ancient towns in Massachusetts and Plymouth have been partially examined; and a large number of books and pamphlets, from which information could be gleaned, have been consulted. The compiler would not pretend that he has personally examined all the records named. It has been principally through the aid afforded by his friends and correspondents in the places where those publick records are kept, that he has been able to avail himself of the facts they contain. To Mr. FRANCIS JACKSON, one of the representatives of Boston, he is particularly indebted, not only for the list of freeman from 1630 to 1662, and the list of representatives or deputies to the General Court of Massachusetts from 1634 to 1692, but for various other information respecting the early families of Boston, and most of the towns in its immediate vicinity. He is also under many obligations for the assistance afforded by their communications, to Mr. JOSHUA COFFIN, of Newbury, Mr. ALONZO LEWIS, of Lynn, Rev. JOSEPH B. FELT, of Hamilton, and Mr. LEMUEL SHATTUCK, of Concord. Had the plan of the work allowed, the authorities for the different facts stated would have been given, but restricted to such narrow limits, it would have been impossible

to cite every author, manuscript, and record which have been used. It will be proper to state that the names of the members of the Ancient and Honourable Artillery Company are derived from the history of the company by Z. G. WHITMAN, esq., of Boston.

It does not appear from the Beverly records whether there was a previous ancestor in N. E. or not, although Winthrop [i. Hist. N. preceding, was of Boston in 1652, where he d. 10 Nov. 1658. His sons, Simon and John were b. in Boston. THOMAS, Watertown 1644. This name perhaps should be Thomas Ewer, who was admitted freeman in 1636, or Ewer should be Eyre.

APPENDIX:

To a Genealogical Register.

CONTAINING CORRECTIONS AND ADDITIONS.

Page 3.—EDWARD FARMER, the common ancestor of the several families in the preceding Register, and the first who came to New-England, emigrated from Anceley in Warwickshire, England, about the year 1671.* He had one child besides those mentioned on page 3; viz. Sarah Farmer, born about 1669; married Thomas Pollard, son of William Pollard of Coventry, England, in November, 1692; was the mother of 15 children, 10 sons and 5 daughters, all born in Billerica, where she died May 3, 1725.

Edward Farmer was the son of JOHN FARMER, of Anceley, who died prior to 1669, and whose widow accompanied, or followed her son to New-England, where she married Rev. Thomas Wiswall, of Cambridge Village, whom she survived, and died at Billerica, May 21, 1686. Her name before marriage was Isabel Barbage, of Great Packington, in Warwickshire. The father of John Farmer was JOHN FARMER, who, according to MSS. of Rev. Richard Farmer, D. D. Master of Emmanuel College, Cambridge, was living at Anceley in 1604. He, it appears, was a descendant from Edward Farmer, Chancellor of the Cathedral church of Salisbury in 1531, who is mentioned by Anthony Wood in his *Athenæ et Fasti Oxonienses*, Vol. 1, page 672.

The family about the year 1490, were living at a Village, called Ratcliffe-Cuiley, in Leicestershire, and adjoins the counties of Warwick and Stafford. "Most of them are buried in a vault belonging to the family in the church in Witherly (near Ratcliffe) in the county of Leicester."†

Page 3.—MARY FARMER, married a Dean of Woburn, and had several children.

BARBARY FARMER, was born in Woburn, Jan. 26, 1677; died in Billerica, Feb. 1, 1681.

*There was a Thomas Farmer, perhaps a brother of Edward, who came to this country about the same time, and was living in Billerica in 1676, but of his descendants, I have no information.

For the gratification of the immediate connexions of the late Governor Strong, the following genealogical sketches, some of which are probably not familiar even to them and none of which can be interesting to the public, are annexed to a small number of the copies of the Sermon delivered at his funeral. To his intimate friends they will be the more valuable, as they are principally taken from a statement made in his own hand writing as early as the year 1777; and as most of the families by the name of Strong, in New York and New England, are supposed to be descended from Elder *John Strong*, it is not impossible that even some remote connexions may be gratified by this mode of preserving the *family record*.

ELDER JOHN STRONG was born and lived in England, at or near Taunton, in Somersetshire. His father, whose name was *Richard*, died when his son was young.

He sailed from Plymouth in England on the 30th of March, 1630, in the ship *Mary and John*, in company with Messrs. Warham, Maverick, Mason, Clap, and others, and arrived at Nantasket on the 30th of May following, and first settled at Dorchester. He married his first wife in England. She died on the passage or soon after landing, and two months after her infant child died. His second wife was *Abigail Ford*, whom he married at Dorchester in 1630.

In 1635 or 1636 he removed to Windsor, in Connecticut, and with four others, Messrs. Mason, Ludlow, Stoughton, and Woolcot, was appointed to superintend and bring forward the settlement at that place.

In the year 1659 he removed from Windsor to Northampton, where he died April 4, 1699, aged 94 years. He was the first Ruling Elder of the church in Northampton. A sister of his, who came with him from England, afterwards married a person by the name of *Dean*.

GENEALOGY.

The following account has been compiled by N. Webster.

Family of John Webster.

John Webster, the progenitor of a large family of that name in Connecticut, was from Warwickshire in England. He was one of the original settlers in Hartford, and one of the founders of the republic of Connecticut. From the formation of the constitution in 1639, to the year 1659, he was chosen to office, and as a magistrate or judge, he assisted in administering the government, from 1639 to 1655, when he was elected deputy governor, and 1656 governor. In the three following years he was chosen first magistrate.

In consequence of a long controversy in the church, of which Mr. Stone was pastor, (for an account of which, see Trumbull's History of Connecticut, Vol. I. Chap. 13,) John Webster and his sons, with a number of their friends, determined to purchase a large tract of land in Massachusetts, and remove with their families. The agreement for this purpose was dated at Hartford, April 18th, 1659, and signed by *fifty nine* persons, belonging to Hartford and Wethersfield, including one or two from Windsor. The tract of land which they purchased included the present towns of Hadley, Amherst, South Hadley, and Granby, on the east side of the river Connecticut, and Hatfield and a part of Williamsburg, on the west side, John Webster's name stands at the head of the list of subscribers; the agreement is also signed by Robert his son. This agreement is recorded on the records of Hadley.

In the same year, 1659, the signers or some part of them, entered upon the work of preparing for settlement in Hadley. John Webster went probably to assist or superintend the laying out of the roads, and other business, but he lodged in Northampton. There he was taken sick, and made his will, which is dated June 25, 1659. This

will is recorded on the probate records of Hampshire county, and a copy of it is now before the writer. It is witnessed by John Russel, Jun. (minister of Hadley,) and Eleazar Mather, (minister of Northampton.

Mr. Webster recovered from that sickness, and was appointed one of the judges of the court, or as he is called, a commissioner. The judges of the court were John Webster, John Pynchon and Samuel Chapin. The court was held alternately at Northampton, and at Springfield. On the 26th of March, 1661, a court was held at Northampton, and Mr. Webster was present, and he with others took the freeman's oath, before Mr. Pynchon, and Mr. Holyoke, who was recorder. But Mr. Webster died on the 5th of April, and undoubtedly was buried in Hadley, according to a direction in his will.*

John Webster's consort was named Agnes; and as her husband by will gave her the use of his house and lands in Hartford during her life, it is probable that she remained in Hartford after his death and died there. The house of John Webster stood on the east side of the highway, running north and south on the east side of the hill on which stood the house of the late George Wyllys, and his house was nearly east of the Wyllys house.

It appears by John Webster's will and by other documents, that he had four sons, Robert, Matthew, William and Thomas, and three daughters. Matthew is first named in the will, but Robert was probably the eldest son, as he was named sole executor, and received the largest portion of the estate.

Matthew settled in Farmington. His name is not among those of the *eighty four* original proprietors, who formed a company for settling in Farmington in 1645. But by the records it appears he was there in 1650, and from that year to 1671; when, being unable to support himself, William Judd and John Woodruff undertook to provide for him and his son *John*, during their lives. In compensation, Matthew Webster conveyed to them two parcels of land. It is not known when he died.†

There was a Thomas Webster also, who owned land in Farmington in 1650; but whether he was the son of John, hereafter mentioned, is not certain; if not, nothing further of him is known.

* Noah Webster, when he resided in Amherst, erected a monument to his ancestor in the Hadley burying ground.

† Extracts from the records of Farmington, communicated by Samuel Richards and Horace Cowles, Esquires.

John Webster, by his will, gave his lands in Hadley to his sons William and Thomas. William married Mary Reeves in 1671. He resided in Hadley, and died there about the year 1687 or '88, and probably without children. His wife, Mary Reeves, was accused of witchcraft about the year 1684-5, and her testimony was taken and sent to Boston. She however died in peace in 1696.

Thomas Webster, the son of John, removed to Northampton, where in 1663, he married Abigail Alexander, and by whom he had three children, Abigail, George and John. He sold his lands in Northampton, and purchased lands in Northfield, and removed to that town about the year 1673. In 1675, Northfield was attacked by Indians and the settlement broken up, and from 1676 to 1682, Thomas Webster resided in Hadley, where he had three daughters born. He afterwards returned to Northfield, where he died in 1686. Northfield was again destroyed by the Indians, and the settlers driven from the place; but the children of Thomas probably remained in that neighborhood, for I have known one person of that name, Ezekiel Webster of Northfield, who was in the house of representatives of Massachusetts with me in 1814, and I knew another in Bernardston.

One of John Webster's daughters, Anne, married John Marsh of Hadley, and died June 9th, 1662. Another married William Markham of Hadley, who afterwards returned to Connecticut. A third daughter, Mary, married one Hunt, but she died before the year 1659. She left two children, Jonathan Hunt, the ancestor of the Hunts in Northampton, and Mary Hunt, who married John Ingersoll of Westfield, from whom have descended the Ingersolls in Connecticut.*

Robert Webster was probably the eldest son of John. He was chosen to represent the town of Hartford in 1656, 1657, 1658, and 1659. He was sole executor of the will of his father, and probably did not remove his family to Hadley, or if he did, he returned to Hartford very soon. He died in 1676, and a copy of his will dated May 20th, in that year, (taken from the records in Hartford,) witnessed by Thomas Stedman and Phineas Wilson, is now before the writer. He gave all his estate to his consort Susannah, during her widowhood. She remained a widow till her death. Her will is dated January 23d, 1698. In this she bequeathed her estate to her five sons named, and to the children of John her eldest son, deceased. The sons then of Robert Webster, were John, Jonathan, Samuel, Robert, Joseph and William. He had also four daughters; *Susannah*, who was married

Pelataiah Webster was a native of Lebanon in Connecticut, but it is not ascertained from which branch of the family he descended. He was graduated at Yale College in 1746. He entered into the ministry, and settled in Greenwich, in the County of Hampshire, Massachusetts. He was predecessor to the Rev. Mr. Cutler, father of the late Dr. Cutler of Amherst.

Mr. Webster being dismissed from his pastoral charge, entered into trade, and settled in Philadelphia, where he accumulated a handsome estate. He had attended a good deal to matters of finance, and during the revolution it was customary for members of Congress, especially the Connecticut delegation, to pass evenings with him, and consult upon the money concerns of the United States. In 1783, he wrote a dissertation on the *Political Union and Constitution of the United States*. In this, he attempted to prove the necessity of vesting Congress with more power.

Mr. Webster had one son, who died in Philadelphia in the summer after the British troops left the city. He had two daughters who married in Connecticut. **RUTH** married John Perit, by whom she had two sons, John and Pelataiah. John settled in Philadelphia, and Pelataiah in New York. After the death of Mr. Perit, she married Mr. Leffingwell of Norwich. She is still living, and a widow.

SOPHIA WEBSTER, the other daughter of Pelataiah, married Thaddeus Perit, and had one son, Pelataiah, who died in early life.

Tradition reports that Pelataiah Webster had two brothers, Constant and Oliver, who settled in Worthington, Massachusetts.

ADDITIONAL EXPLANATIONS.

In arranging those of the same surname alphabetical order has generally been regarded, so that sons are sometimes placed before their fathers.

Each section or sentence beginning with a name in capitals is to be considered as a separate article, or distinct paragraph. It was at first intended that the work should be printed in such a manner that a separate paragraph should be allotted to every person printed in capitals, but the limits would not allow of it.

The children of the early settlers in many instances, from not having the necessary information, are entirely omitted; sometimes but an imperfect list of them is given, and frequently only the names of the sons are mentioned. Where numbered with Arabick numerals, the family is generally complete.

There are probably some errors in assigning the residence of freemen, and especially where there were several persons of the same name.

Dates, where copied by myself, and generally, if not always, when furnished by others, are made according to original records. Characters or marks, denoting office and station, are sometimes omitted by mistake, but not being very essential, their omission will not be here named.
